

Just wanted to make comment on changing Indiana's telephone privacy law! Please DO NOT allow it to change. I appreciate not having all the phone calls. I DO NOT care if it is a business I have a relationship with or not.

The phone calls are an intrusion to my privacy. They are using the phone line I pay for. When a business wishes to start paying my phone bill then it may call me. If I wish to speak with that business, I will call them. I also do not miss the pushy telemarketers who can not take "No Thank You" or "Not Interested" as a good-bye. They get pushy and rude. Listening to answers on my voice mail or answering machine is an abuse of my voice mail or answering machine which I again pay for.

My time with my family is important. My children are growing up too fast for me to spend time answering phone calls to say "NO".

Please continue to support the privacy law the way it currently is. Do not allow business to change that!

Thank you

Andrea Skaggs
